

ACADEMIC DETAILS				
Degree	Specialization	Institute	Year	CPI/%
B.Tech.	Mechanical Engineering	IIT Gandhinagar	2022-2026	6.94/10
Class XII	Physics, Chemistry, Maths	R.P.V.V. Vasant Kunj, New Delhi	2020-2021	91.8
Class X		G.B.S.S.S. Sultanpur, New Delhi	2018-2019	86.2

- PROJECTS
- Wanderlust using NodeJs, ExpressJs, MongoDB, EJS, JavaScript, HTML5, CSS3, Bootstrap

Project Link | Interface Link

- Developed a full-stack Airbnb-like web application enabling users to create, edit, and delete vacation rental listings with image uploads and location-based filtering.
 - Implemented complete authentication system using Passport.js with session management via express-session and connect-mongo.
 - Designed and built RESTful APIs using Express.js and MongoDB (Mongoose) to handle CRUD operations for listing management.
 - Configured image uploads using Multer middleware and integrated Cloudinary for scalable cloud image storage.

[May 2025 - July 2025]
 - SplitDash – Group Expense Tracker | React.js, Node.js, Express.js, MongoDB

Project Link | Interface Link

- Developed a full-stack expense sharing application that lets users add friends, create multiple trip-based groups, record shared expenses with equal, exact, and percentage splits, and instantly view per-user balances and simplified “who pays whom” settlements for each group.
 - Exposed RESTful APIs in Node.js/Express with MongoDB models for friends, groups, expenses, and balances, including validation for exact and percentage splits.
 - Developed a responsive React dashboard (Sidebar, GroupCard, ExpenseForm, ExpenseTable, BalanceSummary, SettleModal) using Axios for all API communication.
 - Designed a custom settlement engine that uses hash maps and greedy matching over debtor/creditor arrays to turn raw expenses into a minimal list of “from → to → amount” transactions, and deployed the system with the frontend on AWS Amplify and backend on Render for live access.
 - GateGuard – Entry Gate Management System

(Prof. Yogesh K Meena, IIT Gandhinagar) | Project Link

- Developed GateGuard, a web-based entry/exit management system for IITGN integrating member, visitor, and vehicle tracking with the centralized CIMS database.
 - Designed MySQL database schema with normalized relational tables and implemented RESTful APIs in Node.js/Express with session validation and Role-Based Access Control (RBAC).
 - Built a responsive frontend (HTML, CSS, JavaScript) for security staff to manage visitor logs, vehicle entries, and gate operations efficiently.
 - Implemented real-time logging and alerts for entry/exit, parking, and security incidents, ensuring auditability and preventing unauthorized access.

[Jan 2025 – Apr 2025]

- TECHNICAL SKILLS
- Programming Languages:** C++, JavaScript, HTML, CSS, Python, Generative AI, Agentic AI, LLM, RAG
 - Frameworks & Libraries:** React.js, Node.js, Express.js, Bootstrap, Material UI, Mongoose
 - Databases:** MySQL, MongoDB
 - Tools:** Git, Postman, Visual Studio Code, MATLAB, MongoDB Compass
 - CS Foundations:** Data Structures & Algorithms (DSA), OOP, DBMS, ML, DM, Foundation of AI

- ACHIEVEMENTS
- Actively involved in competitive programming, solving 300+ problems on [LeetCode](#) and participating in multiple coding contests.
 - Secured an All India Rank of 11977 in Joint Entrance Examination (JEE Adv.) and 97.3 percentile in JEE Main.
 - Qualified JDST 2021(Joint Dakshana Scholarship Test) and was selected for the Dakshana One-Year Scholarship Program for JEE Advanced preparation.

- POSITIONS OF RESPONSIBILITY
- Event Coordinator, Blithchron'22 '23 (IIT Gandhinagar Cultural Fest):**
 - Played a key role in the planning and execution of major festival events, including Aerosol (Graffiti Competition) and Panache (Fashion Show), managing logistics and coordinating with multiple teams.
